Software: SolarWinds, Cisco GUI, ServiceNow, Wireshark, Nmap, Nessus, Spring Boot, Linux, Angular, Docker, Postman, PostgreSQL

EXPERIENCE

Boldyn Networks

Pittsburgh, PA

Field Services Representative I

October 2025 - Present

- Managing two medium sized campuses while serving as a secondary for UoPitt's network of 2,500+ access points, responding to student work orders within SLA limits, and troubleshooting issues using LinkRunners, toners, cable termination, access point RMAs, CLI commands, and other dashboard tools.
- Monitor SolarWinds and Cisco wireless controller dashboards daily to ensure my assigned campuses are operating at optimal performance while quickly identifying potential issues.
- Collaborate on network improvement projects such as changes or hardware installs with Boldyn team members at different campuses to strengthen infrastructure performance and reliability across campus environments.
- Perform preventative maintenance to keep network spaces organized and operational. This includes updating documentation, weekly speed checks, pre-student move-in checks, IDF/MDF closet upkeep, inventory tracking, etc.

Network Services Installer Intern

Traveling

June 2025 - August 2025

- Performed staging and configuration of approximately 100 network switches weekly at the HQ in Austin, TX. This included VLAN setup and firmware validation, preparing them for deployment to university networks nationwide. These included Dell and Cisco switches.
- Installed 50 to 300 access points at University of North Texas and Coastal Alabama Community College, followed by post-installation troubleshooting in collaboration with remote network engineers to ensure optimal network performance.
- Installed network switches in IDFs/MDFs, assisted in fusion splicing, and reorganized existing cabling at University of Texas at Arlington.

Duquesne Club

Pittsburgh, PA

Part Time Valet Attendant

Sept 2023 – Present

- Provide valet and guest services for members and visitors from around the world at the Duquesne Club, ensuring efficient vehicle handling while maintaining a high standard of hospitality and customer satisfaction during events and gatherings.

CGI

Pittsburgh, PA

Software Developer Intern

Jun 2023 – Aug 2023

- Developed and improved a client-onboarding portal (internal recruiting application) as part of a full-stack team, collaborating with CGI developers and Pitt classmates in an Agile environment.
- Built and integrated interactive UI components using HTML, JavaScript, Angular, and Vue.js, implementing asynchronous API calls and debugging endpoints with Postman.

PERSONAL PROJECTS

Password Manager Website

- Developed a password manager site using Python for data encryption, PostgreSQL for secure data storage, and JavaScript (Node.js), HTML, and CSS for the frontend interface.
- Enhanced security by implementing SMTP, SSL, and OT authentication, ensuring strong protection for user data.

ACTIVITIES

- Certified PA West Soccer Referee since 2013
- Foreign language learner
